CULTIVATE THE KNOWLEDGE

4.3m wide x 6.4m long All Steel Polytunnel Kit

Add a new classroom with a Monbulk Rural Enterprises' Polytunnel (PTK) Kit, a versatile and adaptable style of greenhouse ideally suited for schools. A greenhouse creates a temperature controlled environment, enabling a variety of crops and plants to be grown year round. Available in 2.75m wide and 4.3m wide (pictured), and 6.4m long.

Nursery Benches

Monbulk Rural Enterprises' makes these benches in-house from rust resistant gal. coated steel to withstand most nursery conditions. Made at an ideal working height, reduces the need to kneel or bend over.

Propagating Cell Trays & Clear Top Covers

Begin the lesson with the basics of propagating from seeds. With a cell tray and a clear top lid any student can watch a plant come to life.

Temperature Controlled Plant Propagation

Promote soil temperatures that stimulate plant propagation. Heat'N'Grow Heat Trays and Heatwave Panels provide growers with an efficient control of root temperature in young plants, whilst maintaining a microclimate of up to 45cm above the bed. These products can be used on benches, and the system is simple to install and requires no specialist knowledge, just an electrical outlet.

Bird Net

Protect the outdoor plants from the birds, by using a bird net.

Weed Mat

Weed mat creates barrier from weeds, but also giving a durable surface for students to walk on.

Frost Cloth

Protect plants, in or out of the greenhouse from winter frosts by using a frost cloth.

Vege Net

Protect the plants from the moths and insects by using a Vege Net.
